Education

Jaypee University of Engineering and Technology
Bachelor of Technology in Computer Science Engineering

August 2022 – July 2026
CGPA - 7.6

Technical Skills

Languages: Python, C++, HTML/CSS, SQL
Developer Tools: VS Code, Google Earth Engine, QGIS, Fusion360, ROS
Technologies/Frameworks: Linux, GitHub, LaTeX, Git, NumPy, Pandas, Matplotlib, OpenCV

Experience

National Remote Sensing Center, ISRO

June 2025 – July 2025

Student Intern

Hyderabad, Telangana

- Engineered key modules of the Lightning Forecasting Outreach Mapping System by integrating remote sensing data with statistical techniques to enhance **forecasting accuracy by an estimated 20%**.
- Automated **data preprocessing, visualization, and spatial trend analysis** using **QGIS and Pandas**, improving efficiency in handling large-scale atmospheric datasets.

Defence Research Development Establishment, DRDO

May 2024 – July 2024

Student Intern

Gwalior, Madhya Pradesh

- Fine-tuned deep learning models, namely **LSTM, GRU, RNN, and Bi-LSTM**, for **time series forecasting of Air Quality Index (AQI) in India**, enhancing model performance and achieving up to **96% accuracy**.
- Partnered with a fellow intern to improve model reliability by developing a robust preprocessing pipeline with **Pandas** and **NumPy** for large-scale air quality datasets.
- Created comprehensive performance dashboards using **Matplotlib** and **Seaborn** to visualize forecasting trends, enabling a data-driven evaluation of model prediction accuracy.

Projects

Time Series Forecasting of AQI in India | [GitHub](#)

June 2024

- Achieved the best predictive performance with a GRU model**, outperforming standard RNN, LSTM, and BiLSTM architectures with a **top R score of 0.479** and the lowest Root Mean Squared Error.
- Engineered a robust data preprocessing pipeline for a large-scale time series dataset, successfully identifying and treating outliers using the Interquartile Range (IQR) method.

Classification and Correlation of NO₂ Concentration with Lightning Occurrences | [GitHub](#)

August 2025

- Conducted **spatial correlation analysis** between lightning occurrences and atmospheric **NO₂ hotspots** across India using **Google Earth Engine, Python, and QGIS**.
- Applied **SVM-based classification** on Sentinel-5P NO₂ data, improving spatial **accuracy by 15%** compared to rule-based methods and automating preprocessing and visualization workflows.

Leadership / Achievements

- Regular participant in coding contests with a [LeetCode](#) rating of 1538.
- Received a Letter of Appreciation from Dr. A. C. Pandey (Scientist-G, DRDO) for the exceptional contributions to the AQI time series forecasting project.
- Achieved **School Topper** rank in the PI QUIZ conducted by **IIM Indore** among 1000+ students.
- Served as an Advisor for RosPinot, the college's robotics club, mentoring 30+ students.
- Current Advisor of the Bureau of Indian Standards (BIS) Club.
